

INTRODUCTION

- Overview of Class –
 - Build a basic understanding of Amazon offerings in chatbots, including Alexa, Lex, and Polly.
 - Review a working chatbot built on Lex.
 - Walk through the steps to get started building a ‘Hello World’ chatbot with Lex.
 - Will pause for Q&A as well as one short break.
- Sample Source Code –
 - <https://github.com/terrenjpetererson/lex-hello-world>

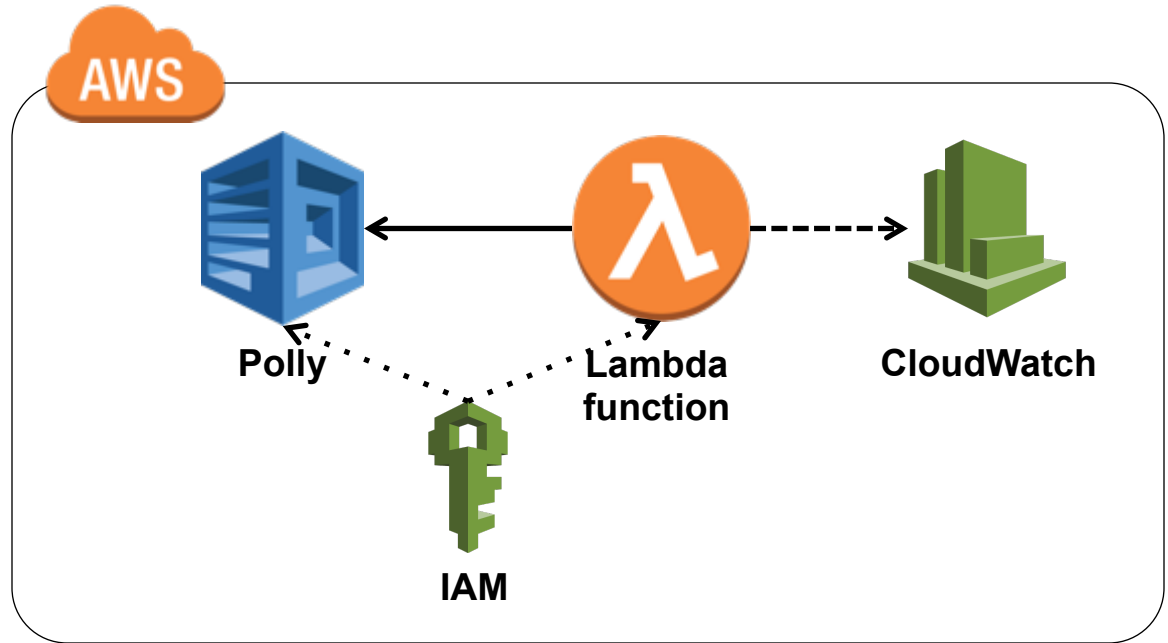

USING AWS DEEP LEARNING ENGINE

BUILD LOGIC TO TRANSLATE INTENT

POLLY CONVERTS TEXT BACK TO SPEECH

INTERFACE CONTRACT BETWEEN LEX AND LAMBDA IS STANDARD

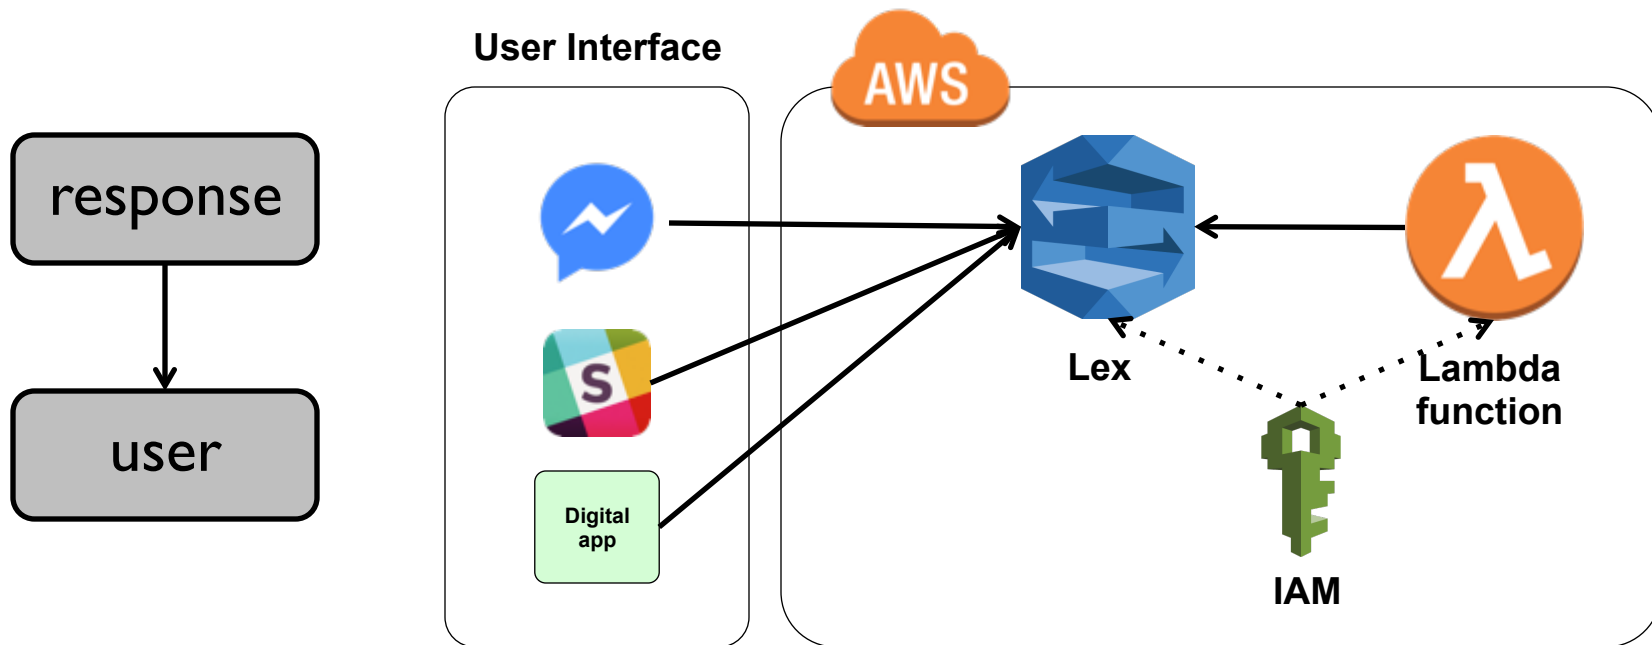

Simple Request

```
{
  "messageVersion": "1.0",
  "invocationSource": "FulfillmentCodeHook",
  "userId": "xxxx",
  "sessionAttributes": {},
  "bot": {
    "name": "HelloWorld",
    "alias": null,
    "version": "$LATEST"
  },
  "outputDialogMode": "Text",
  "currentIntent": {
    "name": "Welcome",
    "slots": {},
    "slotDetails": {},
    "confirmationStatus": "None"
  },
  "inputTranscript": "how are you doing?"
}
```

Simple Response

```
{
  "sessionAttributes": {},
  "dialogAction": {
    "type": "Close",
    "fulfillmentState": "Fulfilled",
    "message": {
      "contentType": "PlainText",
      "content": "Hello. I am a chatbot that can assist you."
    }
  }
}
```

INTEGRATE INTO ANY DIGITAL APP

NLU INTERPRETS USER RESPONSES

LEX PROVIDES THE FRAMEWORK FOR LARGE BOTS

DEMONSTRATION – COMPONENT WALKTHROUGH IN AWS

- No action required by students.
- Screenshare from Instructor.

Q&A

BREAK

GETTING STARTED WITH POLLY

- Log into AWS account.
- Bring up Polly service.

GETTING STARTED WITH LEX

- Log into AWS account.
- Bring up Lex service.
- Follow instructions to create basic intents.

CREATE AN AWS LAMBDA FUNCTION

- Log into AWS account.
- Build Lambda function from Lex template.
- Copy code from 'Hello World' github repo.

Q&A

BREAK

GETTING STARTED WITH LEX

- Log into your AWS account now.
- Return to the Lex service that was created.
- Test by integrating the Lex bot with the Lambda function.

CLOSING Q&A AND DISCUSSION

- What comes next?
- Building a runtime version that can be integrated with a user interface.
